Agilent N5230a Manual

The target was caused mainly due to manual operation and manual height adjustment of the antenna array.

by measuring the return loss, or Sn, using an Agilent N5230A network analyzer. The manual selection of the different fabrics can be replaced.

Note: Agilent changed name to Keysight. All WinCal WinCal has some tools to get around that (see the manual). N5230A - A.06.01.05 and A.06.04.05.
